**Manufacturing System**

CK8 storage is produced in manufacturing facilities whose processes are certified to ISO 9001 and ISO 14001 quality standards.

## CK8 | Pedestals

CK8 pedestal carcass is precision engineered from a one-piece steel wrap with no visible seams or joints and offers exceptional strength characteristics.

Simple and elegant design with slim edge profile and full width bevel pull. All drawer fronts are finished in white with carcass in silver, charcoal or white. Drawer interiors are finished in black and pre-punched to take compartment dividers.

Pedestals are available as either mobile units or fixed units which can support worksurfaces. Pedestals are available in different configurations - Box/File, Box/Box/Box, Box/Box/File or File/File. Optional seat cushions are also available.

Pedestals are available in standard width of 400mm and slim version of 300mm that would be suitable for call centre applications or where space is limited.

Fitted with full extension ball-bearing slides as standard. Slides in higher specification with interlock and soft-closing functions are also available.

# CK8 | Lateral Filing Cabinets

Cabinet cases are designed and engineered with no seams at corners featuring an unique and clean aesthetics.

File drawers can take letter, legal or A4 hanging files in side to side or front to back arrangements.

Standard features include lock bars on both sides for added security, core-removable lock that allows keying changes on site, and adjustable leveling glides accessible from the inside of cabinets.

Optional fabric tiles (may be specified initially or added later) that are flush with the cabinet edges, offer an attractive design of cabinet back that could facilitate the cabinets used as space divider between departments or along corridors.

Fitted with interlocked full-extension ball-bearing slides that prevent tipping by allowing only one drawer to open at a time conforming to the latest BIFMA safety standards.

## CK8 | Tower Storage

CK8 Storage Tower is a range of storage units that are designed to integrate with workstations to provide personal storage, extended work area and increased privacy (with Tower Cabinet).

Towers are available in 2 heights: Tower pedestal in 655mm; Tower Cabinet and Tower Wardrobe in 1200mm.

Tower Cabinets offer a variety of compartments for box files or equipments or accessories such as pigeon holes, and paper trays.

Supporting castor included as standard with optional counterweight.

Tower pedestals provide a compartment for box files and a drawer with pencil tray behind a single drawer/door front.

## CK8 | Hinge-door & Stack-on Cabinets

Standard Hinge-door storage cabinets are available in 4 heights with core-removable lock that allows keying changes on site, and adjustable leveling glides accessible from the inside of cabinets.

Doors are available in metal or clear tempered glass. Metal doors with full height reinforcement bars are fitted with rubber bumpers or optional soft-close fittings for quiet operations.

All doors are fitted with quality hinges, free swinging, integrated side and eccentric depth adjustments.

Low and medium height lateral units and hinged-door cabinets can be stacked together to form a high storage centre to meet different storage needs. Stacking units with slim edge profiles are visually pleasing even when units are ganged top to bottom or side by side.

With fabric tiles at back of cabinets, units can be stacked in front-to-back configurations for visual and/or functional requirements.

# CK8 | Features

Floor pedestals, Tower pedestals, 2-High Lateral and Storage cabinets are designed to support worksurfaces with rectangular beam structure that gives the worktop a floating appearance.

Core-removable locks with flip keys are standard. Available in Key-random or Key-alike options.

CD racks can be specified as optional interior accessory for drawers of pedestals and lateral cabinets.

Coloured glass, veneered or melamine-faced worktops are available as options to enhance aesthetics and/or practicality of the storage units.

Tackable fabric tiles can be added to back of cabinets to meet functional and acoustic requirements.
